

BATHROOM LIGHTING

ZONE 0

Is the interior of the bath tub or shower tray. We do not supply lighting for this zone.

ZONE 1

This is the area directly above the bath or shower tray to a height of 2.25M above the floor. A minimum of IPX4 (splash proof) is required for normal domestic use.

ZONE 2

This is the area over the bath tub or shower tray above Zone 1. This is the area external to Zone 1 and extends vertically 0.6m external to Zone 1 to a height of 2.25M. Protection required is the same as Zone 1.

ZONE 3

This is the area shown above Zone 2 in the illustration above. This is the area external to Zone 2 to a distance of 2.4M from Zone 2 and a height above the floor of 2.25M. The protection required for normal domestic use is IP20.

We recommend that you consult a qualified technician to ensure that all wiring and supply are protected in accordance with regulations before undertaking any work in a bathroom.

The above does not apply to communal baths and showers where jets of water are used for cleaning purposes.
